Hi Publisher,

I hope this email finds you well.

I have built the installer using the files provided and tested.

During testing, I observed the following issues,

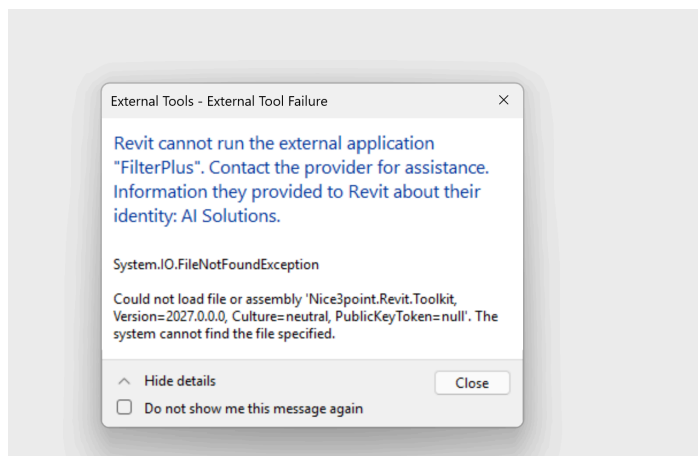

1. Website link

Website link is still not updated, as informed before kindly place your LinkedIn account link in the field.

2. App not loading

App is not loading in any of the compatible version of Revit. It is giving command failure error after launching.

Refer the below screenshot for more info,

Click on the 'Download Now' button to download the installer from below link.

<https://apps.autodesk.com/RVT/en/Detail/Index?id=1973309639971090853&appLang=en&os=Win64&mode=preview&autostart=True&loginRequired=True>

Please fix the reported issues and resubmit the app again for review.
Looking forward to your response.

Thanks & Regards,

Rakeshnayaka M

EXTERNAL EMAIL : Do not click any links or open any attachments unless you trust the sender and know the content is safe.

Good morning Mr. Rakeshnayaka,

Thank you for your email and for the guidance regarding the website link. I have provided the link to my LinkedIn profile, which I hope will be sufficient. I have submitted the updated information again.

I look forward to your response.

Kind regards, David Barbero-Sastre

Hi Publisher,

I hope you are doing well.

I would like to follow up regarding my previous email.

The website link you provided is not accessible or appears to be invalid. If you are experiencing issues with your website, you may instead provide a link to your LinkedIn profile or another professional platform where users can learn more about you or your organization.

I look forward to your response.

Thanks & Regards,

Subject: RE: Autodesk App Store : Revit : Initial review - FilterPlus

Hi Publisher,

Thank you for submitting your app to the Autodesk App Store.

After reviewing your recent submission, I identified the following issues that need to be addressed before the app can proceed with the review process:

1. Add-in Files Missing

The submitted bundle does not contain the required add-in files. Please include the add-in files, as they are necessary for creating the Autodesk standard installer.

For reference:

- You may install any free plugin from the Autodesk App Store to review the expected file structure: <https://apps.autodesk.com/en>
- The following video demonstrates the process of creating a bundle for the Revit Store: <http://www.youtube.com/watch?v=Ht1i34gEgCQ>

2. Website Link

The website link provided in the submission is not valid. If you intend to use your publisher profile page as the website URL, please replace the current link with the following:

<https://marketplace.autodesk.com/error/not-found?from=%2Fpublisher-profile%3Fid%3D35CZJE7V2MUF>

Please update the submission with the required corrections and resubmit the app for review. We look forward to receiving your updated submission.

Thanks & Regards,

Hi Publisher,

Thank you for resubmitting your app to the Autodesk App Store.

During the review, I noticed that the following previously reported issues have still not been addressed:

1. Website Link Missing

The website link is still missing. Please add your website URL. If you do not have a website, you may provide your Autodesk App Store publisher profile link instead.

2. Custom Installer

Kindly provide a justification for the need for a custom installer.

3. App Description

The app description still does not meet our minimum requirements. Please provide a more detailed description of your app and its functionality.

4. App Compatibility

Please confirm whether the app supports both Autodesk Revit and Advance Steel, or only Revit.

Looking forward to your response.

Thanks & Regards,

Subject: RE: Autodesk App Store : Revit : Initial review - FilterPlus

Hi Publisher,

I hope this email finds you well.

I am pleased to inform you that, we received the approval from compliance team to proceed with your app.

Kindly find our initial observations below,

1. Custom installer.

We normally do not encourage custom installer to the store, majority of the apps in store have our standard installer where users find consistency throughout the app store.

We do allow custom installers when the application requires registry settings, installing in multiple locations and depend on third party applications

In case, if your requirement falls on above conditions, please consider below necessities while submitting your custom installer:

- Your installer should take care of installation and uninstallation properly. i.e. uninstallation should remove the files completely. And also, it should uninstall the older version and install

the newer version whenever new version is installed.

- Please provide the administration rights for the installer.

Else, provide us the bundle format (addin + dll)

Please take a look at our website to know more about Autodesk Apps

<https://www.autodesk.com/developer-network/app-store/revit>

For Example, please install any one of the free plugin from Autodesk App store

<https://apps.autodesk.com/en>

Here is video recording that explains the steps involved in creating a bundle for Revit store. <http://www.youtube.com/watch?v=Ht1i34gEgCQ>

2. Publisher privacy policy

Please note there is a new field 'Publisher Privacy Policy' which has been added in the publisher workflow.

Each App must include a link to the applicable privacy policy in this field and within the App in an easily accessible manner.

The privacy policy must clearly and expressly do the following:

- Identify and describe the data, if any, that the App collects, how that data is collected, and all uses of that data.
- Confirm that any third party with whom an App shares that data will provide the same protection of that data as stated in the App's privacy policy. Examples of such third parties are analytics tools, advertising networks and third-party SDKs, as well as legal affiliates of the Publisher (parent, subsidiary, related entities).
- Explain Publisher's data retention and deletion policies.
- Describe how end users can revoke consent and/or request deletion of their data.

3. Screenshots and videos

Could you please add few screenshots or videos to App Store. Adding screenshots or videos is a good way to showcase your app.

(Note: Minimum "4 screenshots" or "3 screenshots and a video" is recommended for the better appearance of the app in the App Store page).

4. Website

We noticed that your website link is currently missing from the submission. Kindly add your website link at your earliest convenience.

If you do not have a website, you may instead provide your Autodesk App Store publisher profile link.

5. App compatibility

You have selected the app is compatible with Autodesk Advance Steel, Kindly confirm whether app supports Autodesk Advance Steel or Autodesk Revit.?

6. App description

The current app description does not meet our minimum requirements. Please enhance the description by including more detailed information about your app's features, functionality,

and benefits to the users. Kindly note that the app description plays a significant role in influencing users' decision to download the app. Therefore, ensure that the revised description is compelling, informative, and consists of at least four lines with a minimum of 4000 characters.

7. Digital signature.

Also, we noticed that installer file is not digitally signed. We recommend you to digitally sign the file and resubmit the app. However, please note it is not mandatory to digitally sign, to publish an app in the Autodesk App Store.

But due to security concerns prospective customers would not download and install the app. Let me reiterate failing to digitally sign won't stop publishing an app in the store.

Looking forward to your response.

Thanks & Regards,
